| A. |  | B. |  | A. (2) | 15 ft. sections of garden hose
Sprinkler heads with 4 dial-in
patterns and built-in spikes |
| | | | | B. (3) | |

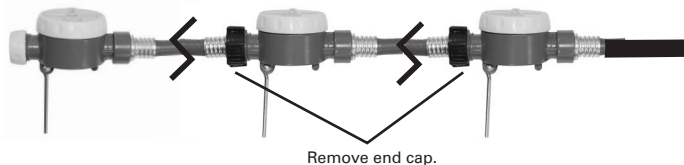

Installation & Operating Instructions

This all-in-one watering solution is so easy to use, you might not even need this 5-step guide. But if you do, just follow through this step-by-step.

Step 1: Attach sprinklers to hose sections

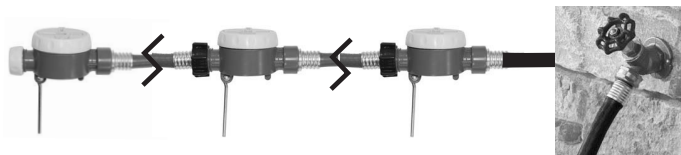

Attach sprinklers to the (2) 15 ft. garden hose sections supplied.

Remove end caps from 2 of 3 sprinklers and keep for possible future use. Note: you do not have to use all 3 of the sprinklers provided. Your system will work with just 1 or 2.

Step 2: Attach leader hose from faucet

Attach end sprinkler without end cap to leader garden hose from faucet (leader hose not included).

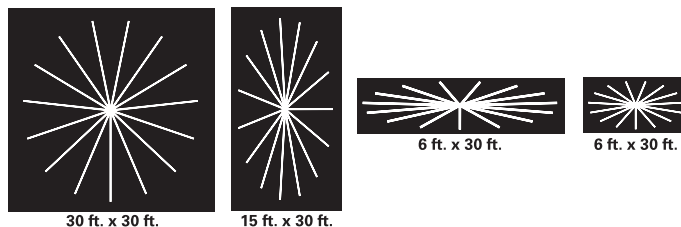

Step 3: Position sprinklers in yard

Position sprinklers in yard where needed. See step 4 for coverage area reference. Each sprinkler has a built-in metal spike for stability. If spike is needed, unsnap spike end from sprinkler body and insert into ground when positioning sprinklers in the yard.

Step 4: Dial-in water pattern

Each sprinkler has 4 dial-in patterns: 6 ft. x 15 ft.; 6 ft. x 30 ft., 15 ft. x 30 ft., and 30 ft. x 30 ft. Turn the dial to select the size spray area you want on each sprinkler. Actual coverage area will depend on several factors including water pressure and length of leader hose (longer leader hose = decreased water pressure/coverage).

Step 5: Turn on the water

Turn on the water and enjoy! Increase/decrease water flow for further coverage area adjustments.

Tip: Add a timer for convenience and to save water! (not included)

CAUTION: Shock Hazard: Do not spray near electricity. Detach from faucet during freezing weather.
